June 5th, 1957

Professor Joshua Lederberg
Genetics Building
University of Wisconsin
Madison 6, Wisconsin
U.S.A.

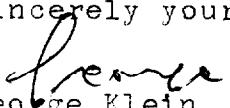

Dear Joshua:

Thank you very much for your letter. I have now made arrangements to come to Madison by the direct air coach of Northwestern Airlines from New York on June 25th. I shall be glad to give a lecture on June 26th. I think that the title is all right although I am not really sure that the word "clone" is quite adequate. Would "Variations in populations of tumor cells" be to diffuse?

There was just a committee meeting in connection with the Microbiological Congress and it was decided that the status of the session on transformation will be changed to a symposium and you will be asked to act as discussion leader. This should greatly facilitate the financing of your trip from this side. You will receive an official letter about it very soon. I hope that this is all right with you.

Looking forward very much to see you soon and with best regards,

sincerely yours,

George Klein
